

EnviroAire IAQ UV's unique combination of UV-C light and activated carbon achieves unmatched microbial and odor reduction without producing any harmful ozone. EnviroAire IAQ UV is particularly effective at reducing odor-causing volatile organic compounds (VOCs) which include toxic chemical vapors like formaldehyde and toluene.

EnviroAire IAQ UV is installed in the duct work of the central air system so it can remove airborne contaminants as they pass by.

Indoor air pollution is often five times worse than outdoor air pollution. The unique design of EnviroAire IAQ UV addresses both biological and chemical contaminants in indoor air.

EnviroAire IAQ UV purifies the air of sub-microns that are nearly impossible for standard purifiers to filter out. EnviroAire IAQ UV also sterilizes microbes as they pass by in the air stream. The result is cleaner, healthier, fresh smelling indoor air.

FEATURES
